## Education and Selected Courses

2019 – Ongoing	<b>Sharif University of Technology, Electrical Engineering - B.Sc.</b> <i>Graduate Courses</i> <ul style="list-style-type: none"><li>Statistical Machine Learning (Differential Privacy, Interpretability, Bayesian Nonparametrics, PGMs)</li><li>High-Dimensional Probability Analysis (Concentration Inequalities, Covering/Packing Numbers, etc.)</li><li>Statistical Learning (Classical Machine Learning, Mathematical Foundations of Machine Learning)</li><li>Applied Stochastic Processes (Audited) (Markov Processes, Hitting Times, Monte Carlo Methods, etc.)</li></ul> <i>Undergraduate Courses</i> <ul style="list-style-type: none"><li>Algorithms and Data Structures, Convex Optimization, Linear Algebra</li></ul>
-------------------	--

## Research Experience

**Broad Research Interests:** Applied Probability, Reliable and Secure Machine Learning, Theory of Deep Learning

2023 - Ongoing	<b>Graph Structural Shift - Research Assistant</b> <i>Supervisor: Dr. Gholamali Aminian at The Alan Turing Institute</i> <ul style="list-style-type: none"><li>Investigating the effect of hemophily properties of graphs on domain adaptation techniques for graph neural networks. Wrote project code. <a href="#">[Github]</a></li></ul>
2023 - Ongoing	<b>Improving DP-SGD with Self-Supervision - Research Assistant</b> <i>Supervisors: Prof. Hamid Rabiee, Gita Sarafrasz at Data Science and Machine Learning Laboratory (DML)</i> <ul style="list-style-type: none"><li>Proposed several ideas to improve upon DP-SGD (gradient and instance normalization, nearest centroids with self-supervised pretraining). Wrote project code. <a href="#">[Github]</a></li></ul>
2023 - Ongoing	<b>Self-Supervised Anomaly Detection - Independent Research</b> <ul style="list-style-type: none"><li>Proposed an approach utilizing self-supervised models such as DINO and developed a novel outlier threshold selection method. Wrote project code. <a href="#">[Github]</a></li></ul>
2023 - Ongoing	<b>Revenue Maximization in The Bitcoin Lightning Network - Research Assistant</b> <i>Supervisor: Dr. Mojtaba Tefagh, Blockchain Programme Manager at the University of Edinburgh</i> <ul style="list-style-type: none"><li>Helping develop a realistic model of the Lightning Network and an approximate algorithm for revenue-optimal channel selection.</li></ul>
2022 - 2023	<b>Transfer Learning for EEG Signal Classification - Research Assistant</b> <i>Supervisor: Mohammad Bagher Shamsollahi, Biomedical Signal and Image Processing Laboratory (BiSIPL)</i> <ul style="list-style-type: none"><li>Studied applications of transfer learning in EEG classification. Implemented papers and proposed novel ideas. Gave many presentations on the topic. <a href="#">[Project Github]</a></li></ul>
2022 - 2023	<b>Speech Recognition for Farsi, Stable Diffusion with Persian Artstyle - Research Assistant</b> <i>Speech and Language Processing Lab (SLPL) and Asr Gooyesh Pardaz Company Joint Projects</i> <ul style="list-style-type: none"><li>Fine-tuned deep speech recognition models such as the Conformer for Farsi. Worked on fine-tuning Stable Diffusion both language-wise (Farsi) and style-wise (Persian). <a href="#">[Github]</a></li></ul>

## Teaching Experience

2022, 2023	<b>Machine Learning Summer Workshop - Instructor</b> <i>Scientific Association of The Electrical Engineering Department at Sharif University (Resana)</i> <ul style="list-style-type: none"><li>Lecturer (2x) (60 participants at the 2023 workshop) <a href="#">[2022, 2023]</a></li></ul>
2021, 2022, 2023	<b>Teaching Assistant</b> <ul style="list-style-type: none"><li>Introduction to Machine Learning (4x) - EE Department, IE Department <a href="#">[Materials Example]</a></li><li>Linear Algebra (Mathematical Methods in Engineering) - EE Department</li><li>Object-Oriented Programming (2x) (course project head, 200 students) - EE Department</li></ul>

## Research Proposals

---

- |      |   |
|------|---|
| 2023 | <b>3D Medical Image Segmentation with Segment Anything</b><br><i>Supervisor: Dr. Mojtaba Tefagh</i> <ul style="list-style-type: none"><li>Proposed several research directions for automated and accurate 3D medical image segmentation with applications in radiotherapy. Helps and meets with students working on the projects.</li></ul> |
| 2023 | <b>Architecture-Aware Deep Differential Privacy</b><br><i>Supervisor: Dr. Mohammad Hossein Yassaee</i> <ul style="list-style-type: none"><li>Proposed the idea of taking model architecture into account when designing DP mechanism, by utilizing the dependence of backpropagation on gradient multiplications only.</li></ul>            |

## School Projects

---

- |      |  |
|------|--|
| 2022 | <b>SVM Implementation from Scratch - Convex Optimization</b> <ul style="list-style-type: none"><li>Numpy implementation of an SVM classifier with interior-point optimization from scratch [<a href="#">Github</a>]</li></ul>        |
| 2022 | <b>EEG Classification for Bistable Perception - Fundamentals of Neuroscience</b> <ul style="list-style-type: none"><li>Classification of EEG when watching an optical illusion. Recorded data and trained deep classifier.</li></ul> |

## Skills

---

- Comfortable coding in Python, Matlab, C++, C, and Java
- Presentation of technical subjects to large audiences
- Team communication

## Hobbies and Interests

---

- Wrote several simple games with an AI player
- Hosted and coordinated English free discussion sessions at Sharif University (3 years)
- Amateur piano player, writes little tunes sometimes
